Paper Basket

In this week remeber to use paper bags only

3 days

to finish

Break

Do this every day

Contrary to appearances, paper bags are very durable. There are many advantages to using these bags. For example: recycling rate. Paper is a raw material that is very easy to recycle.

Re-Quests

Challenge yourself!

If you are ready to take up the challenge, try out your willpower and endurance, you must take part in our Re-Requests app!

[Create account](#)
[Read more](#)

Our app

The application was created to help you **recycle your rubbish**

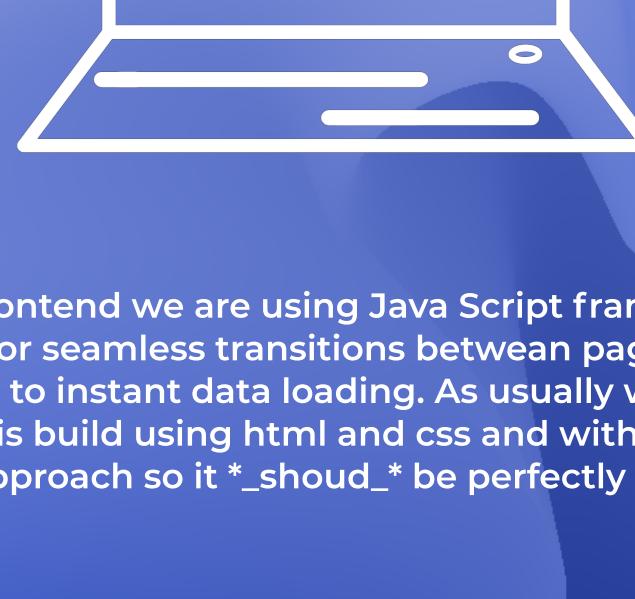

Have you ever ask yourself,

"Do I care for the Earth the way I should?"

If you still do not know the answer to this question, download this application. Every day you will receive a task that will help you sort your garbage and more

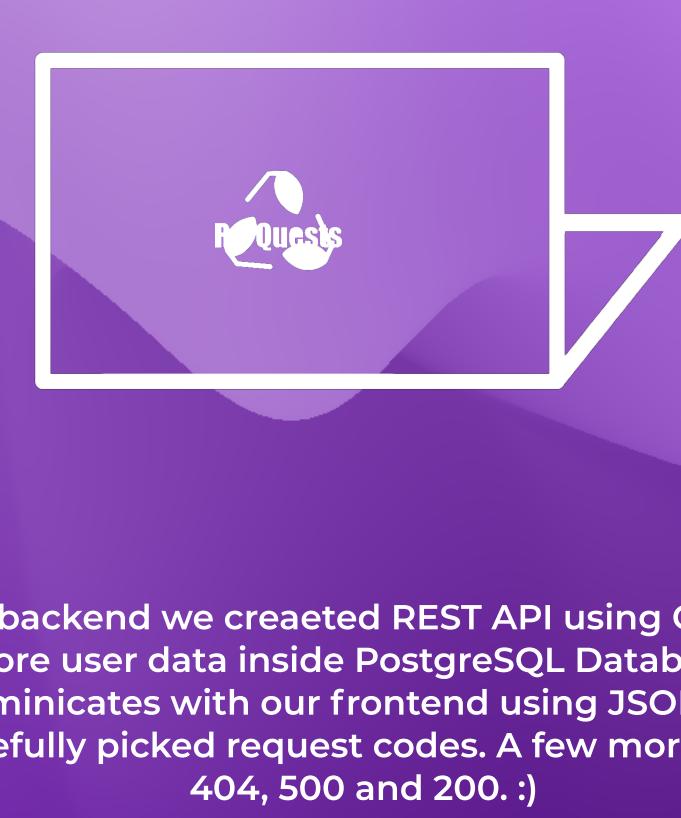

Technologies we used

Front-end

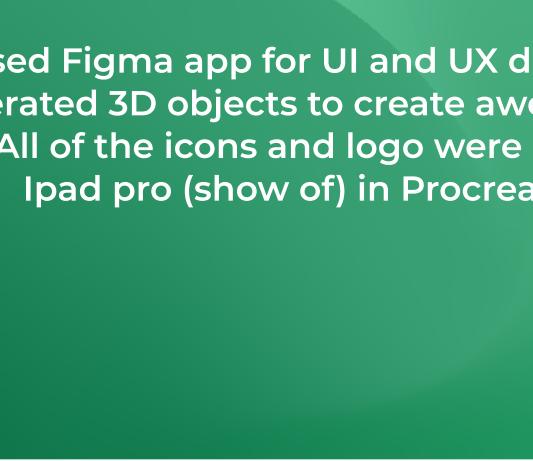

On frontend we are using Java Script framework Vue for seamless transitions between pages and close to instant data loading. As usually website itself is build using html and css and with mobile first approach so it *should* be perfectly scalable.

Back-end

For backend we created REST API using C#. We store user data inside PostgreSQL Database. It communicates with our frontend using JSON and carefully picked request codes. A few more than 404, 500 and 200. :)

Design

We used Figma app for UI and UX design. We also generated 3D objects to create awesome medal gifs. All of the icons and logo were drawn on the iPad pro (show off) in Procreate app.

Our Team

<p>Filip Dąbkowski</p> <p>Project manager, Front-end dev</p>	<p>Franek Łuczakiewicz</p> <p>UI designer, Graphic</p>	<p>Przemek Urbanek</p> <p>Back-end dev</p>	<p>Katarzyna Straszkiewicz</p> <p>Coach</p>
